# Illegal Immigration Accountability and Control

There are many national issues that currently affect the legal citizens of the United States as it relates to illegal immigration. Of primary importance is the extremely high cost of having illegal immigrants in the United States. Our system of US government is not designed to provide continued support to illegal immigrants currently residing in the United States as our national deficit will attest. At the same time, our US workforce must have the option of being augmented with low-cost labor as currently afforded by the illegal immigrants living and working in the United States.

To ensure the peaceful deportation of the illegal immigrants currently living and working in the United States, while simultaneously augmenting our US workforce with low-cost migrant labor, we must privatize immigration control. In Chapter 2 of *Building the American Fulcrum*, details are provided about the revolutionary USA-SAFE Program. Through the USA Structured Augmentation of Foreign Employees (USA-SAFE) Program, the United States can peacefully ensure the deportation of most illegal immigrants from the US while continuing to support the current American workforce. Once fully implemented, the USA-SAFE Program can generate more than $29 billion annually to private US businesses. In addition, the USA-SAFE Program has been designed to pay for the security and control of our US borders ("Securing our United States Borders") by adding an estimated $21 billion annually to the US Border Defense Program.
