

# Securing Our United States Borders

There are currently no US military assets pre-positioned along any of our US borders, leaving the borders open and exposed. With nothing in place to counter an insurgent force (in any capacity) on any US border, our legal US citizens are left vulnerable to whomever and whatever wants to enter our country. In 2015, over 350 million people crossed over the USA-Mexico border legally and more than 200,000 illegally. The irresponsibility of our US government to control our US borders has led to more than 11 million unauthorized illegal immigrants living and working in the United States.

In the *Securing our United States Borders* chapter of *Building The American Fulcrum*, prior US Special Forces commanders have created a strategic and complete plan for closing and securing all of our United States' borders. This 60 page chapter provides, in EXTREME DETAIL, the processes by which the United States government can immediately close and secure our US borders.

We must hold our US government accountable for the lack of US border control that has led to 11.3 million illegal immigrants living in the US, enormous amounts of illegal drugs crossing our un-controlled US borders, and numerous devastating terrorist attacks conducted due to the lack of US entry control of foreign visitors.

***“It’s Time for All of us to Stand Up  
and begin fixing America!”***
